### Counselor's Corner - Ms. H

The classroom work is almost done, the textbooks will be closing soon, and it will be time to trade the pencils for popsicles! What a year this has been, and I have enjoyed getting to know your children this year and helping them to learn and grow. During this last month of school we will be reviewing many of the things we learned this year, and focus on summer safety. I want the 8 Never Never Rules and the 3 Ways to Stay Safe to be fresh in our minds.

I wanted to share with you some information and activities to help children continue to practice their emotional regulation skills over the summer months. Here is a rough sequence of things children need to learn about their emotions. These understandings are the foundations of emotional health. Everybody experiences a range of feelings at different times:

1. All feelings/emotions are normal and OK;
2. I experience feelings in my body. These relate to my emotional states;
3. I can notice tricky feelings like anger, sadness, fear and worry when they start to happen in my body.
4. I can name and talk about how I'm feeling;
5. Feelings come and go. They don't stay forever;
6. Big feelings like anger, sadness, fear and worry can be scary;
7. Ignoring difficult feelings away can make them seem bigger;
8. Our difficult feelings don't need to be fixed. Sometimes we just need someone to sit with us while we experience them;
9. Noticing our feelings, accepting them, naming them, talking about them, or just sitting with them makes them feel less scary
10. I can use my tools to help calm my big feelings.
11. I'm always a good person, even when I have difficulty managing my big emotions.

I am including a link to an emotions scavenger hunt. This would be a fun way to practice identifying emotions and trying to figure out what "Tools" the person could use to get back to the green zone. If you would like to have a printed copy for the summer, just reach out to me and I can get one printed and sent home for you to use. [Mosswood Connections](#)
