

Transportation

As we all know, basketball season is here. Seems like staff expect me to abandon our priorities on taking kids home which trumps basketball, I had numerous requests on how to transport basketball teams during the Native American Classics. I gave a schedule to the athletic director which was given to coaches, but with a teacher whom was persistent on how and when to pick up ball players.

With that being said, we are short drivers and some trips I have to bring in sub drivers to do activity bus runs, so that teacher and the rest of the staff need to follow the chain of command and respect the decisions that are handed down.

At the beginning of each month I will submit a rotation of trips with assigned drivers to the superintendent and athletic director, from there they can hand out to whom ever. I'm not trying to be difficult but when you have staff making plans creates problems. This is all do to short staffed bus drivers.

O/M

With Christmas break approaching, we will be waxing, stripping and shampooing floors. Basically, we will do the whole district, disinfecting doors, tables, restrooms and anything staff and students touch. That is one of my big peeves is having a clean and good looking school. Our kids deserve the best and should have the best clean facility to learn here at Rocky Boy Schools.

As a supervisor, I'm open to suggestions that can help make it better whether its in O/M or transportation, Please stop by my office to see what's going on with you're two departments. I can update you on staff and our daily operations.

We have changed alarm codes through out the district, I have given codes to all supervisors and there should be no problems with alarms going off. I'm here at 5 every morning to open the district but I cant always be here to do that.

We would like to wish everyone a Merry Christmas and a Happy New Year from your Operation and Maintenance and Transportation Departments !!!!!
