RE: Indian Grove Solar

Last winter, the operations committee reviewed solar panel programs at Euclid Elementary school and brought a recommendation to the board to put solar panels on top of Euclid's roof after construction concluded the following summer. The administration conducted an RFP process and selected the company 93 Energy to install solar panels at Euclid. At the November 12, 2024 Committee of the Whole meeting, the board gave the administration the direction to use grant and electricity incentive funds to install one microgrid and solar panels on both elementary schools.

Aaron Raftery from Nania Energy will review two roof-top solar panels options from 93 Energy with the committee members. The committee members will bring their recommendation to the February 11, 2025, Board of Education meeting for approval.
