Maintenance:

Construction is going on! We had a leak in the HS Auditorium and we believe we have it fixed but I am going to have the roofers look at it anyway. Also, Parsley Roofing is going to look at one of the new science labs at HS because we may have a leak there. I have done the keying legend for Royal Architect for the locks and doors for this first part of the construction. Also, I was told that some of you are asking about our holidays, so in front of you, you have a holiday schedule for the Maintenance and Custodial Staff. This doesn't include some of us that will have our last week of vacation at Christmas. Other than that, things are really busy.

Transportation:

I had to have a little work done to bus #52. We have a little work to do on a couple of other buses. We just got water back on to the bus barn and now waiting on warm weather to be able to wash a few vehicles. Everything is going good at this time.

All of the Maintenance and Custodial Staff wish you and your family a Merry Christmas and a Happy New Year!!!
