

## **KAUFMAN ISD - MAINTENANCE REPORT**

### **JANUARY 2026**

The Kaufman ISD maintenance team has continued to work on improvement projects around the district. In addition to those projects, there were over 155 work orders completed during the month of December.

Here are a few of the projects that the team has been working on this month:

The maintenance crew teamed up with contractors and student workers to add a final coat of foam to seal the gym at Phillips Elementary. This final layer should keep the water from infiltrating that space for years to come.

**The grounds crew began working on the baseball facility to prepare it for the upcoming season. The trees were trimmed and Rye grass was added to the field. It's looking good!**

Over Christmas break, the crew used some specialized equipment to complete projects around the district. Below, the guys use a SkyTrac to lift a new HVAC unit onto the roof of Monday Primary.

Once on the roof, the team spent some time finishing up the install.

Below, the guys use our skid steer to relocate some extremely heavy items at Nash.

**It was the Holiday season so the crew managed to find some time to bring out the flat grills and cook for the good folks over at Nash Elementary. Nice job guys!**

**The KISD maintenance crew received 155 work order requests last month. To this date, the crew has completed 152 of those orders at a rate of 98%. The last 3 are still in progress. The crew would like to wish everyone in the district a very Happy New Year!**
