To Whom it may concern,

I highly recommend Hooper Elementary's second grade team for the prestigious E+ Team Award. Stephanie Liechty, Stacy Wilcox and Kamie Bolingbroke have consistently demonstrated exceptional effectiveness in their collaborative efforts to enhance student learning and achievement.

This team has exhibited an outstanding commitment to analyzing student data, identifying individual student learning needs and creating targeted learning interventions and extensions in order to meet ALL of their students' needs. To say this team works collaboratively and shares students is an understatement. There have been many times during PLCs that I have asked about an individual student and every teacher on the team has been able to report on that particular student's progress. This is due to the fact that their collective efforts to ensure student academic growth is shared. In their minds all of our second grade students are "their" students and they work together to meet all of their students' needs.

Over the past three years, an average of 81% of their students have achieved typical growth or above on the end of year Acadience test. This is an exemplary accomplishment and students benefit from their collaborative nature and strong teamwork. Their dedication to ongoing assessment and data analysis has resulted in significant improvements in student outcomes.

Moreover, this team has been instrumental in creating a supportive and inclusive learning environment. They actively engage in open discussions, share best practices, and leverage each other's expertise to ensure that all students receive the necessary support to learn at high levels.

I wholeheartedly recommend the Hooper second grade team for the E+ Team Award. Please consider them for this prestigious award. Thank you for your consideration.
