Re: Data Warehouse Application
Date: June 15th, 2012

Please submit this purchase information to the BOE for the June 25, 2012, meeting.

After considering multiple options for data warehousing and assessment building applications, the district curriculum and technology departments are recommending the purchase of two components of the PerformancePLUS web-based data solution by SunGard. The two components that we are looking to purchase are PerformanceTRACKER, for horizontal, vertical, and longitudinal monitoring of student performance on state and local assessments; and AssessmentBUILDER, for building and scoring local benchmark and common assessments. These products include easy to use synchronization with the Common Core State Standards in ELA and Math, as well as IL State standards in Science and Social Studies, and the use of over 19000 item bank questions.

The purchase of these PerformancePLUS applications will replace the district's use of Data Director and save the district approximately \$11,000 in annual fees.

ACCT	Description	Cost
Curriculum	PerformanceTRACKER & AssessmentBUILDER 2 year license fee	44,812
Technology	Professional Services, Configuration, Training	17,900
Technology	OCR Software	995
	Total	\$63,707

These components will be purchased from SunGard, Inc.
