

## State Data Reporting: Public Act 265 of 2018

Beginning in Fiscal Year 2019-2020, institutions will be required to submit the information below through the Center for Educational Performance and Information (CEPI). CEPI is the state agency responsible for collecting, securely managing, and reporting education data in Michigan. CEPI applications include:

Michigan Student Data System (MSDS)

Student Transcript and Academic Record Repository (STARR)

Reporting student-level data will also allow our member institutions inclusion in the higher education program platform, the MI School Data portal. The portal for education data is used to help citizens, educators, and policy makers make informed decisions that can lead to improved success for Michigan students.

Trainings were held for members (CEPI data reporting) on April 23 and July 10.

For this year, institutions can either submit the phase I information below to CEPI or submit through a survey that will be sent to them by the Department of Treasury and CEPI. The survey was sent to members last year to submit this data.

The Department of Treasury shall collaborate with the center to use the P-20 longitudinal data system to report the following information for each qualified postsecondary institution:

(a) The number of phase I students in the most recently completed academic year who in any academic year received a tuition incentive program award and who successfully completed a degree or certificate program. Cohort graduation rates for phase I students shall be calculated using the established success rate methodology developed by the center in collaboration with the postsecondary institutions.

(b) The number of students in the most recently completed academic year who in any academic year received a Pell grant at the reporting institution and who successfully completed a degree or certificate program. Cohort graduation rates for students who received Pell grants shall be calculated using the established success rate methodology developed by the center in collaboration with the postsecondary institutions.

MICU will work with member institutions on the requirements below and will submit the required data on behalf of the membership to the Department of Treasury and to the Senate and House Appropriations Subcommittees on Higher Education.

The department of treasury shall not award tuition grants to otherwise eligible students enrolled in an independent college or university that does not report, in a form and manner directed by and satisfactory to the department of treasury, by **October 31** of each year, all of the following:

(a) The number of students in the most recently completed academic year who in any academic year received a state tuition grant at the reporting institution and successfully completed a program or graduated.

(b) The number of students in the most recently completed academic year who in any academic year received a state tuition grant at the reporting institution and took a remedial education class.

(c) The number of students in the most recently completed academic year who in any academic year received a Pell grant at the reporting institution and successfully completed a program or graduated.

By **February 1, 2019**, each independent college and university participating in the tuition grant program shall report to the senate and house appropriations subcommittees on higher education, the senate and house fiscal agencies, and the state budget director on its efforts to develop and implement sexual assault response training for the institution's title IX coordinator, campus law enforcement personnel, campus public safety personnel, and any other campus personnel charged with responding to on-campus incidents, including information on sexual assault response.
