Bus returns to BHS by 5am (approximately)

As of right now, they have it set up for 140 students which is close to what they had last year. They won't have an exact number until we get closer to the date. Last year, they had 8 chaperones. With the number being close to 140, I think we need at least 8 again. They would like to use school transportation like they have in the past.
