## CtG - Increasing Yearly 4-Yr Graduation Rates

49. Regarding the four-year federal graduation rate that is used in the Closing the Gaps domain, student groups who met or exceeded their targets will be required to exceed that rate in the following year. Does this mean that if, for example, the Pacific Islander student group had a 91.0 percent federal graduation rate in 2018, they have to have at least a 92.0 percent federal graduation rate in 2019?

No, graduation rates are rounded to one decimal place; therefore, the student group must exceed their prior year rate by one tenth of a percentage point. For example, if the student group achieved a 91.0 percent federal graduation rate in 2018, they'd have to achieve at least a 91.1 percent federal graduation rate in 2019 to meet the target.
