#### **3 – Wireless Networking Upgrades; Dr. Silverman, Asst. Supt. for Curriculum and Instruction, Mrs. Hoffman, Dir. of Technology**

---

The number of hardware devices used in District 26 to support teaching, learning and communication has been steadily increasing over the years. The Technology Department has been experiencing problems with the number of devices trying to connect to the wireless network. The solution will include not only the purchase of additional wireless equipment but also a cost for moving the current access points and a consulting fee. Included in Board members' packets is the administration's rationale and recommendation for a solution to this problem.
