

NWEA Assessment Packages

MAP Assessments: A computerized, adaptive, state-aligned assessment program that provides educators with information they can rely on to improve teaching and learning. Includes assessments designed for students in kindergarten through high school.

Analytical Tools and Classroom Resources: Instructional Resources, DesCartes: A Continuum of Learning, Lexile scores and resources, and the Dynamic Reporting Suite are included in your annual MAP subscriptions. Lexile scores are available with MAP for Primary Grades.

Professional Development: On-site and online options available (see below). MAP Administration training, designed to help you get started, is required as a condition of enrollment.

Annual MAP Subscription/MAP for Primary Grades Subscription per student:

when testing greater than 65% of district enrollment	\$12.50
when testing between 50-65% of district enrollment	\$13.00
when testing less than 50% of district enrollment	\$13.50

Additional Assessments

Science Tests: Computerized, adaptive assessments that cover two realms of science: concepts and processes, and general science. State-aligned tests are available for several states.

Per Student Tested **\$2.50**

Mathematics with Spanish Audio tests: Nationally-aligned, computerized, adaptive mathematics assessment that includes Spanish voice-translations.

One Time Fee **\$1,000**

Professional Development

MAP Administration training for teachers, proctors, administrators, and the district leadership team (provided for both MAP and MAP for Primary Grades). **This training is required as a condition of enrollment.** MAP Administration training is designed for districts new to MAP assessments.

• 0 - 750 district enrollment	On-Site Workshop	\$2,700 (includes travel)
• 0 - 750 district enrollment	Online Workshop	\$1,500
• 751 - 3,000 district enrollment	On-Site Workshop	\$3,200 (includes travel)
• > 3,000 district enrollment	On-Site Workshop	\$3,700 (includes travel)

The following workshops are designed for **MAP Licensees**. We recommend scheduling the workshop after the first test season is completed. Attendees are encouraged to bring their own data to enhance the value of the workshop. Pricing is based on district size and includes the cost of the materials and the facilitator's travel expenses as follows:

• 0 - 750 district enrollment	Online Stepping Stones to Using Data	\$1,850
• 0 - 3,000 district enrollment	On-Site Workshop	\$3,200
• > 3,000 district enrollment	On-Site Workshop	\$3,700

Stepping Stones to Using Data: Attendees gain an understanding of the reports available after testing. This workshop provides an opportunity for all staff members, including the district leadership team, to take a look at their data, learn to interpret data, and develop a common vocabulary to facilitate communication.

Climbing the Data Ladder: Attendees learn to apply the information available on reports to their instructional practices. Participants learn how to use test results to differentiate instruction, form flexible groups, and develop strategies to ensure instruction meets the needs of every student.

Growth and Goals: Attendees use growth data as the basis for establishing and evaluating goals. Participants learn how to work with students to set growth targets and understand how to analyze data over time to identify effective programs and instructional practices.

Note: Regional workshops are available for Stepping Stones to Using Data, Climbing the Data Ladder, and Growth and Goals. Regional workshops may be more cost effective and provide the opportunity to learn from the experiences of other districts.

NWEA Knowledge Academy online courses are **included with your MAP license**. Knowledge Academy is designed to deepen your district's shared understanding of student assessment data with easily accessible online courses. These convenient courses provide educators the training they need, at their pace, and within their schedules. Knowledge Academy is an excellent resource for staff-turnover-training or as a refresher for existing staff.

• For a formal subscription agreement, please contact your Partner Relations Representative. All quoted prices are subject to change. A \$1,500 minimum annual license fee applies.
