25 September 2018

Beth Brungardt
Keeling Elementary School

Dear Beth,

Since 1983, our mission has been to promote academic excellence through the expansion of resources that enrich the education, development, and well-being of the students of the Amphitheater Public School District. The Amphi Foundation has, for most of its history, focused primarily on services that help make it possible for students to attend school and participate in activities and in recent years we have added Classroom Grants to support our students' teachers and their classrooms. Our Scholarships & Grants committee is proud to honor your grant request. Congratulations!

Funding for this grant was provided by the Nova Home Loans Arizona Bowl. Our hope with this partnership is that the Amphi Foundation will receive this gift again next year and beyond. You can help us by sharing photos, thank you notes and success stories about the impact of this funding so that we can share with our partners at the Arizona Bowl.

Please keep the following items in mind as you move forward with implementing your project and purchasing materials.

- If, for some reason, you do not proceed with this project, we ask that you return this money to the Amphi Foundation so that we can assist another classroom in need.
- Please be sure to follow district and school procedures for procurement.
- For any equipment or durable goods that have been purchased with this funding we ask that you consider gifting items to an Amphi colleague or teaching partner should you choose to leave the district.

On behalf of the Amphi Foundation Grants & Scholarships Committee, thank you for all that you do!

Best Regards,

Leah Noreng

Amphi Foundation Grant Proposal

Provide an objective and the purpose of the project

**General purpose
of the project:**

The use of various sensory tools can help students regulate their bodies and emotions. Any student at Keeling could use the items during a break to regroup in order to get back into class.

Describe the project and how it will enhance the learning environment and promote academic excellence.
List the subject areas involved in the project.

Project Synopsis:

This project would assist any child having difficulty in any subject area. The tools will teach the students that they need to regulate in order to be able access their learning. When students are having heightened emotions or their bodies have too much energy, a quick trip to the sensory room to use a few tools can give them the break they need. They will then be ready to go back to class and participate in their learning.

Provide the standards of measurement to be used to determine if goal(s) have been achieved and timeline for assessment of results. *If applicable, explain how the project will be sustained without committing district funds.*

**Evaluation and
Sustainability plan:**

A documentation form will chart the behavior and needs the student have prior to using the sensory room. After participating in various sensory activities and the student has gone back to class, the teacher can note the result and how effective the use of the tools were for the student. The Occupational Therapist, Physical Therapist, Teacher of EDP students, office staff, and/or other adults at Keeling will work together to keep all items in working order.
