Superintendent

**ACTION**

**BACKGROUND INFORMATION**

We have had desire to upgrade sentry and fire monitoring systems for some time now. Some of these concerns could be addressed with larger facilities concerns down the road, but given current funding outlook and any future facilities program timing – we may want to leverage the balance remaining for QSCB improvements to upgrade these systems at this time.

We have solicited proposals for upgrades that will be presented at the meeting for consideration.

**ADMINISTRATIVE RECOMMENDATION**

If the Board is satisfied that the best approach is to include larger remaining facilities concerns in any future proposed bond proposal / planning – I recommend leveraging part of the balance of QSCB allocations to complete these upgrades at this time if suitable proposals are available. Existing security systems may present vulnerabilities that we are not willing to tolerate.

**APPROVAL/DISAPPROVAL**
