

# **Board Report for November 9, 2015**

## **Maintenance:**

Still working on work orders and other things, trying to get caught up. I have hired Rocky Rexrode as maint. asst. The extra hands will help. I am in the process of cleaning up and throwing junk away to make room for everything in the coop barn. I guess that is it.

## **Transportation:**

Everything is running right now except for BB-2. I am having some issues with the "low coolant" alarm. Hopefully I will get it very soon. Loaned Booker BB-1 on the Friday that we played them due to their bus wouldn't start. Everything was good there. I am figuring out how I am going to park the vehicles when we have to get out of the coop barn. I guess that is it.
