HOME HOSPITAL SERVICES DISABLED STUDENTS

As part of the continuum of services to be available for disabled students, a disabled student may be entitled to receive educational services at home or in a hospital or other setting if it is anticipated the student will be unable to attend school for two or more consecutive weeks, or on an ongoing intermittent basis, due to a medical condition. The goal of home/hospital instruction is to reasonably support and continue a student's education during an extended absence and to enable the student to return to his/her classroom or program.

The Superintendent, or designee, is authorized and directed to develop procedures to implement the requirements of this policy.
