## Introduction

In response to **LINCOLNWOOD SCHOOL DISTRICT 74's** Form 470 bid **#230003956**, I'm providing information on an AT&T solution that may meet your requirements and qualify for E-Rate funding. The solution includes the following components:

- **AT&T Internet for Business**—a broadband internet access service that uses advanced, IP-based technology and a combination of fiber and copper lines to connect your location to the internet. AT&T Internet for Business offers downstream speeds of over 1 Gbps, so you can quickly download large files, handle e-commerce transactions, and use interactive video for teleconferencing or monitoring.

## Features and Benefits

The solution gives you the following:

- **High Bandwidth**—lets you transfer data much faster than with traditional DSL service—up to 5Gbps downstream where available. Faster transmission speeds help increase your efficiency and productivity because you can quickly send and receive large files.

You can also enjoy clearer video interaction with video conference meetings, streaming internet video, or remote video monitoring.

- **Static IP**—lets you create a distinct presence on the web with IP addresses that don't change. For a nominal fee, your customers, clients, and suppliers can access applications and other resources at your location or in your network to enable eCommerce. So, you can define and customize your own web identity.
- **Business Class Support**—includes a 24/7 help desk. Our highly trained help desk technicians work with you over the phone to resolve issues, and we quickly dispatch a technician on-site if required to resolve the issue.
