Re: UPS Battery Replacement

Please include a recommendation to approve the replacement of the Buildings Uninterruptable Power Supply (UPS) batteries on the agenda of the Board of Education, Committee of the Whole meeting on March 21, 2022.

The recommendation is to replace the UPS batteries. The UPS powers the building network electronics to provide backup power to the switches, phones, and PA's during a power outage. The current UPS batteries were replaced as part of the 2013 Bond project and the batteries are due for replacement.

The recommendation is to award the contract to JEM Tech Group. This project is competitively bid through the federal eRate program. The cost of this project is not to exceed \$30,895. The purchase will be made using bond funds and is eligible for eRate reimbursement.

Thank you for your attention to this request.
