

Proposals were solicited for exterior building signage for the DAEP building. Proposals were received from Texas Correctional Industries, CCSW (Corpus Christi/Houston), and State Sign (Orange). All bidders were sent the following specifications as per Pfluger and Associates in order to be consistent with the signage that will be used at the new administration building:

- Arial font
- Cast aluminum 12" (by 1" depth)
- Brushed aluminum (painted baked enamel)
- Mounting: bar double – 1 ½" aluminum extrusion mounted to building – bar color same as building
- "West Orange-Stark Academic Alternative Center"

Proposals were received as follows:

- Texas Correctional Industries	\$2,311.79	No drawing/rendering provided
- CCSW	\$4,918.00	No drawing/rendering provided
- State Sign	\$5,192.00	Rendering provided

Note: The prices listed above do not include any necessary permit(s).

Texas Correctional Industries does not manufacture cast aluminum letters but instead manufacture engraved foam letters. Foam letters on the exterior building will probably not be durable enough for the environment or potential vandalism. CCSW and State Sign can provide the signage meeting the required specifications.

Installation will occur after the exterior standing seam metal façade where the signage is to be mounted is painted.
