

Curriculum and Instruction

We continue to work with building teams to get the necessary materials and trainings in place. The middle and high school had training in the new math program that they will be piloting this year. Study sync training was also offered to the high school and middle school. There have been numerous webinars available for all teachers.

Professional Development

There is a lot of building trainings that are going on. The trainings pertain to much of the new programs that are going on. PD in DESSA and AIMSWEB tend to be the focus of many of the buildings. Coaches have been meeting to help one another in the new programs. The NAS department send out links for Wednesday PD's in IEFA from OPI. A couple of the buildings have opted for this.

District Committees

The district committee lists are on the board agenda for approval. The only addition this year was the science and social studies committees were added in place of the math.

Assessments

Each building is working on getting their baseline assessments done by the end of October for both Title 1 funds and MCLP grant. The high school has still opted to have their writing assessment at the regularly scheduled time due to the ACT test in October. Writing assessment will be pushed back to November for the rest of the grades.

Future plans

Our new committees will be meeting soon. New curricula for science and math samples has been asked for. The data team has also had our first meeting and established goals for the team.
