Summary:	The existing tank is a 1000-gallon single walled gasoline storage tank installed in 1980's. The metal skid containment system is rusted through and has settlement in the bottom of the tank occupying approximately 80 gallons of space. In addition, it does not have a proper ventilation system, limiting us to potential vendors who will provide gasoline. The recommended tank is a 2000-gallon double walled, free standing that can be placed on the existing pad and utilize our currently distribution system
Attachments:	▪ Evaluation Matrix and Bids
Recommendation:	Motion to approve the purchase of a 2000 gallon gasoline tank from Whitener Fuel & Lubricants in the amount of \$12,269.06 and corresponding budget amendments.
