

Artificial Intelligence: A New Frontier

Enhancing Learning and Teaching

What is AI?: Artificial intelligence (AI) is a broad field of computer science that deals with creating intelligent agents, which are systems that can reason, learn, and act autonomously. In simpler terms, AI aims to build machines that can think and learn like humans.

Benefits of AI

- **Personalized Learning:** Tailored instruction based on individual student needs.
- **Automated Grading:** Efficient assessment and feedback.
- **Intelligent Tutoring Systems:** Interactive learning experiences.
- **Language Translation:** Breaking down language barriers.

Tools and Resources

- **Google: Gemini, G-Workspace, Chat GPT, Dalle, Adobe Firefly, Canva, PackBack- Through AVID**
- **Khan Academy, Khanmingo**
- **Ed Apps: HelloHistory.ai, TutorAI.me, esparklearning.com, Teach-Anything.com**

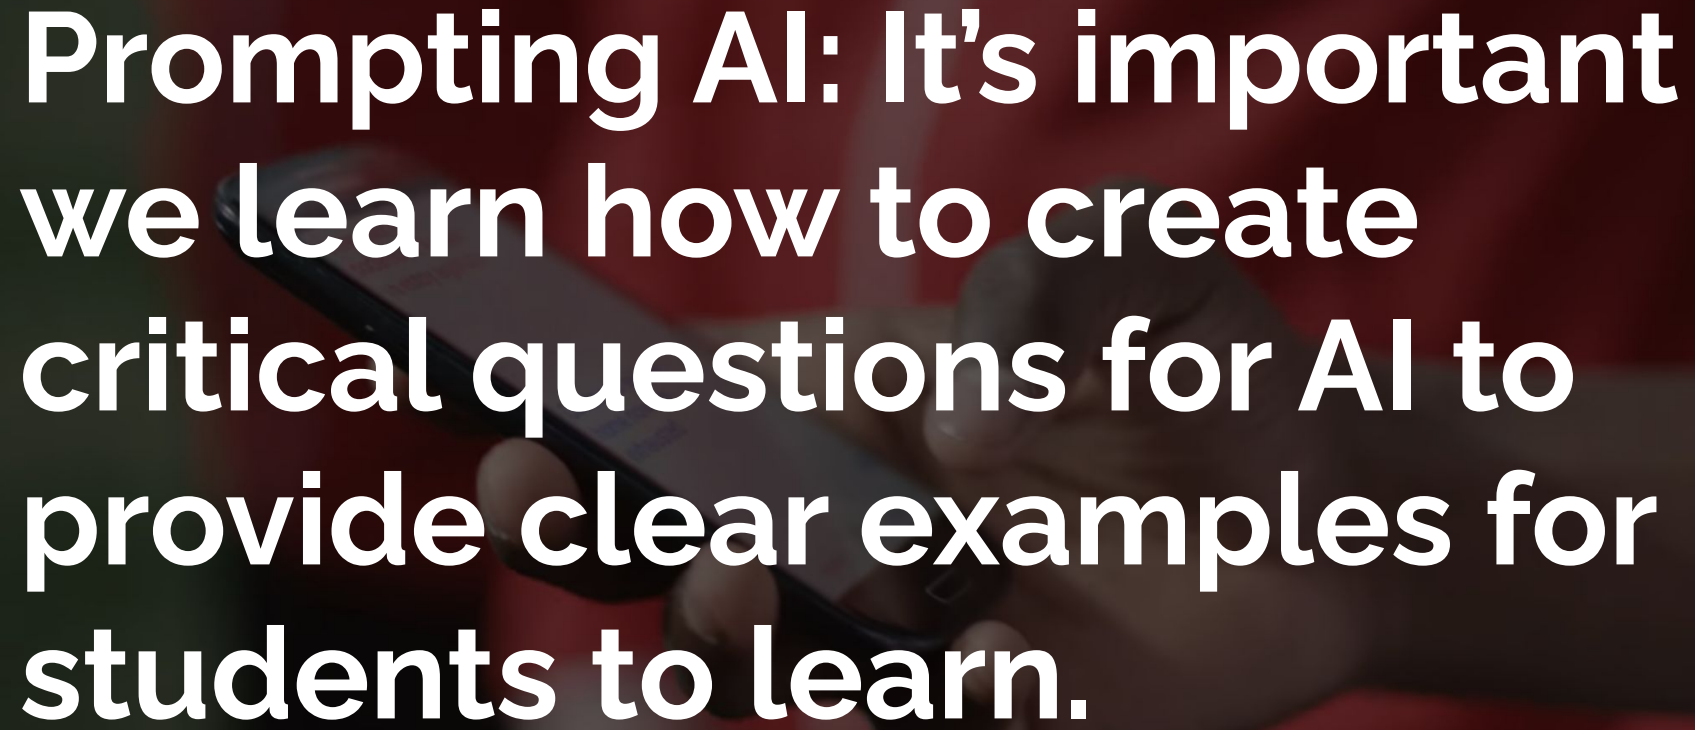

Concerns and Challenges

- Data privacy, bias, job displacement to name a few...
- Teacher development and opportunity
- Accessibility

The Future of our World:
Learn how the tools work
and embrace the
technology for how it can
benefit students and staff-
Create more critical
thinkers.

A hand holding a smartphone is visible in the background, slightly out of focus. The background is a dark red color. The text is overlaid on this background.

**Prompting AI: It's important
we learn how to create
critical questions for AI to
provide clear examples for
students to learn.**

— Guidance for Prompt Engineering

- Be Specific and Clear
- Avoid ambiguity
- Ask clarifying or more specific questions
- Be polite and provide feedback

Let's Tinker!
