

ExxonMobil Foundation Grant Award to the Goose Creek CISD Education Foundation

We are proud to announce that the Goose Creek CISD Education Foundation has received a \$175,000 grant from the ExxonMobil Foundation to support the Goose Creek CISD STEM Resources 2025 initiative.

This funding will help expand access to STEM education across the district through several innovative projects, including junior school robotics programs, virtual reality career exploration, and hands-on environmental science learning experiences in partnership with Artist Boat. Together, these initiatives will provide meaningful, real-world learning opportunities that inspire students to pursue high-demand careers in science, technology, engineering, and mathematics.

We would like to give special recognition to the district's Career & Technical Education and Curriculum & Instruction teams for collaborating with the Education Foundation to make this proposal possible. Their vision and commitment to student success were instrumental in securing this opportunity.

We also extend our appreciation to Connie Tilton from ExxonMobil for approaching us about this grant, and we are honored to welcome Rebecca Matlock from ExxonMobil who is joining us this evening. We are deeply grateful to ExxonMobil for their long-standing partnership and continued investment in the students and educators of Goose Creek CISD.
