Re: Summary of Summer School 2014 and Planned Dates for Summer School 2015

Geneva High School completed a successful summer school program during June and July, 2014. In total, 246 students, filling 253 seats, took advantage of the opportunity to complete a required course, make up a credit course, complete driver education, or participate in a non-credit enrichment program. This represents a very stable enrollment when compared to last year, which had a total of 252 course enrollments. Listed below is a summary of the courses that we ran this past summer:

Courses	# of seats filled
Personal Finance	68
Driver Education	35
English Workshop	23
History Workshop	7
U.S. Government	78
ACT Boot Camp	15
Algebra Bridge	16
Keyboarding/Typing	11
Total	253

Highlights:

- Our credit-based course enrollments have remained stable, and we have offered the same number of sections of these courses for several years.
- In addition to our traditional credit-based summer school offerings, we continued to offer non-credit opportunities as well.
 - Our Algebra Bridge program was well-received by both parents and students. This program was almost exclusively comprised of incoming freshmen who needed a more solid foundation as they enter Algebra at GHS this fall.
 - The ACT Boot Camp was again a success in our second year of offering this program. Students were able to receive the standard ACT preparation program at a special group price as part of our summer school program.
 - Typing/Computer Keyboarding continued to attract interest, mainly from middle school aged students.
- Overall, summer school is financially self-supporting with tuition covering the personnel expenses associated with the program:

Total summer school tuition collected	\$42,440
Total summer school staff payroll	\$38,248
Net	\$4,192

Looking ahead to Summer School 2015, I am proposing the following dates:

Session 1: June 8-June 25, 2015, Monday thru Thursday
Session 2: July 13-July 30, 2015, Monday thru Thursday

I would like to publish these dates now so that students and families can plan ahead, as we usually begin receiving inquiries in late fall.

Please let me know if you have any questions about Summer School 2014 or Summer School 2015.
