## Lewiston Altura School District

### Custodial / Maintenance Report

January 2026

#### **Personnel Information**

We are currently fully staffed.

#### **Training Conducted**

Staff completed OSHA required safety training on Compressed Gas Safety and Lockout/Tagout Energy Release.

#### **Inspections**

- Waiting on MMC to inspect the backflow preventers on the city water intake on the boilers.
- IEA conducted required 6-month AHERA inspection on December 17, 2025.
- Mississippi Welders inspected and serviced the fire extinguishers in the district on December 15, 2025.

#### **Progress on Projects**

- The solar panels have been working uninterrupted.
- Primary roof work has been completed at the high school.
- Worked with Larry Stoos for the installation of electrical power to the C-gym bleachers. The installer had to return and correct some electrical cords underneath the bleachers. The bleachers are now functioning as they should.
- I had MMC look at boiler #3 at the high school which had developed a bad vibration. Parts have been ordered to replace the fan wheel in the burner.
- We replaced three relays in the art room kiln. It is working normally.
- The heat in the maintenance garage continues to function normally.

#### **Comments**

With students and staff off for the holidays we were able to perform some deep cleaning in the schools.

Respectfully Submitted,  
Dan Buege  
Facility Manager
