Re: Bid Results for Lighting Replacement in High School Fieldhouses

We would like to discuss the bid results for the high school fieldhouse lighting project at the next Building and Site meeting on Monday, August 8, 2016. We discussed this item at the recent study session and Harry Lau, Administrator of Facilities and Operations, detailed the benefits of retrofitting the light fixtures. As you may recall, changing these fixtures to LED lighting will be more efficient and provide savings to the general fund. We anticipate a significant cost savings over time from both energy savings and efficiencies in the maintenance department.

The resource for this purchase will be the Sinking Fund Budget.

Please see the attached memo from Mr. Lau, and Mr. Smith from Plante Moran Cresa. As always, feel free to contact me if you have any questions.
