

EXCELLENCE GROWS HERE

Child Nutrition Board Report
March 2026

The revenue for February 2026 is \$158,828.12.

I have attached the meal count and reimbursement comparison showing the difference between last year and the current year. In January you will notice a dip in meals and reimbursement due to being out for the three bad weather days.

The Dietary Guidelines for Americans has been updated, and I have posted them on the Child Nutrition website for all to see. There are several changes.

I have attached the nutrition education curriculum for March.

We have received entitlement for school year 26-27. The amount is \$124,093.54. This will go toward the purchase of USDA foods.

National School Breakfast Week was March 2-5. We promoted different fresh fruits and vegetables. We provided extra nutrition education for the classroom and posted this event on our website and social media. I have attached the special activity sheets.

The total number of direct certifications in the district is 958. This number affects our ability to be a community eligible provision school district which provides free meals to all students.

Tina McCormick
Child Nutrition Director
