

**Minidoka County School District #331**  
**Continuous Improvement Plan Update**  
**June 17, 2019 by Michele Widmier**

While much of the data is not yet compiled at the State level, based on our preliminary ISAT and IRI data, I have highlighted the goals we met in green and those our data suggests we did not meet in red. You will notice in the [updated Metrics](#) that many of the areas are yet to be determined or verified by the State, as this work takes place over the summer. Final 2018 graduation data for the district will not be populated in the State Report Card until late August and final Go On rates will be updated over the summer. I will report back to you in the fall when we submit the updated version of the [Continuous Improvement Plan](#) in September.
