Re: Revision of the DIP

The 2017-2018 District Improvement Plan was approved by the board in May of 2017. With additional data (such as PBMAS) and the reduction of the Executive Director of Curriculum and Instruction position, we need to revise the District Improvement Plan to articulate strategies for addressing the deficits in the PBMAS data and to designate appropriate staff members responsible for the completion of current goals/objectives.

Recommendation:

The Board of Trustees approve the revisions to the District Improvement Plan as presented.
