

TRANSPORTATION BOARD REPORT FOR MARCH 2017

Submitted By: Wayne Hall

Wayne traveled to Frisco, Texas. He was on a workshop for Transporting Students with Disabilities and Preschoolers on March 16th - 23rd, 2017. During this time Ed Burke is in charge.

We are starting to experience a lot of shortage again for bus drivers. We still have 5 routes that need to be filled.

The mechanics been keeping busy working on the buses, doing service maintenance on the district vehicles and repairing seats in the buses.

Preschool started up again. Deanna is the driver for this class during the day. She picks up students at Head start and brings them to Kw Bergan for services and back to Head start.

The bus driver's been washing buses and district vehicles. They fuel some of the buses and vehicles. Some of the driver's help in the shop area and office areas. They help with other duties.

We have bus #2119 and #516 in Cutbank right now that need the computers reprogrammed on them. They will not regen on there own anymore.

The activity bus #483 had to have an airline hose repaired underneath the bus the mechanics here didn't have the equipment to fix it themselves.

Activity bus #222 heaters was not working. So the mechanics had to send it to Cutbank to get the compression lines that go to the heaters repaired so the heaters would work again.

Lisa is our discipline person at Transportation she does all the viewing of the videos from the buses when there is an incident she is the one to get ahold of if you have any questions.

We had 26 Activity trips for the month of March. This concludes our report for the month of March.
