

Executive Summary

Prepared for Board of Trustees Meeting

August 25, 2020

Denton ISD Asynchronous Learning Plan

Board Goal:

In pursuit of excellence, the district will:

- Incorporate best practices into teaching, learning, technology and leadership
- Foster and support an advanced digital learning environment

Purpose of Report

The purpose of the workshop is to share the Denton ISD Asynchronous Learning Plan (ConnectedLearning), a 37-page plan that describes how virtual learning will be implemented in Denton ISD. The plan will require board approval prior to submission to the TEA for further review and approval. The plan will be considered for approval at the Board of Trustees Meeting on September 8, 2020.

Objectives

The workshop will give a brief description of the eight sections of the ConnectedLearning Plan:

- The Basics
- Core Principles
- Curriculum and Instructional Materials
- Progress Monitoring and Student Experience
- Academic Delivery and Implementation
- Instructional Schedule
- Staff Deployment and Support
- Family Engagement

Operational Impact

The Asynchronous Plan uses the current human resources and budgets that are in place and no further impact on the current local budget. Technology devices and connectivity is being pursued through funding by the TEA (Operation Connectivity).

Results

The plan provides an alternate delivery system of teaching and learning to our students—virtual learning. Parents may make the choice to access ConnectedLearning rather than face-to-face learning.
