Subject: **New Course Approval for Midway High School**

MISD Board of Trustees: August 12, 2025

Agenda Item – 8A7

Background Information

TEA has chosen not to renew four innovative courses that MISD currently offers. They have, however, offered replacement permanent courses that offer the same opportunities for our students.

Aerospace Engineering is transitioning to Aerospace Design I
Civil Engineering and Architecture is transitioning to Architectural Design
Engineering Design and Development (EDD) is transitioning to Engineering Design and Presentation
Introduction to Engineering Design (IED) is transitioning to Engineering Design Process

Attached you will find the TEKs for all the new Engineering courses and changes. We are only recommending the four courses listed above. TEA and the Texas Register have not officially posted the TEKs nor broken the document allowing for each course to be downloaded individually. As such you have all of TEAs Engineering recommendations instead of just the 4 changes.

Fiscal implications

None. Each course is funded in a similar fashion to the old.

Administration Recommendation

MISD administration recommends approval of these courses.
