

Navigator

GovFunds, doing business as Navigator, specializes in assisting vendors and businesses with local government sales, as well as helping agencies and organizations apply for project funding.

When referring to our company and your partner in the funding process, your team will call us Navigator.

We offer two products: Pipeline Navigator and Funding Navigator.

Pipeline Navigator

Thrive in Local Government Sales.

Pipeline Navigator is our vendor and business product. This solution will enable your team to onboard clients and monitor their progress with our team.

Your clients will not have access to the information that our team shares through this product.

Pipeline Navigator is solely focused on our partnership with your business and team.

Your clients will not need to know what Pipeline Navigator is.

Funding Navigator

Your guide to grant funding.

Funding Navigator is our agency and organization product. Your clients will use this solution to collaborate with our team throughout the funding process.

When involved in a project with your company, our team will refer to that as a **vendor-sponsored project**. Your team will only receive reporting about this specific project.

Agencies and organizations also have the option to subscribe to Funding Navigator directly.
