## APRIL 2023 SCHOOL BOARD REPORT

### 4K Egg Drop Event

On April 6th, we held a family outreach day with our 4K families. Students made vessels at home to protect their eggs from falling from the roof and families came in to watch them fall. After the dropping of all the eggs, families decorated egg shaped rocks to take home. We had almost all of our families attend this event.

### Forward Testing Celebration

Last Friday we held our "We did our best celebration!" Through our processes of getting students to take the state exam, we have made an emphasis of trying their best. Students reflected on their efforts towards the forward with their teachers. We celebrated these efforts with a Glow in the Dark event. We had glow in the dark connect four, capture the flag and singing events. Students enjoyed this unique celebration and some yummy snacks.

### Goal Setting

Students in grades 3-5 have been engaged in a goal setting process with their homeroom teachers. To begin this process, each student met with their teacher (one-on-one) to discuss their academic progress and set an academic goal around Math, ELA or effective habits. They also made action plans to attain their goals. Teachers then supported students over the past two months in working towards reaching their goals.

### Thematic Unit Events

This years Thematic Unit is called "The Sky's the Limit" and it kicked off this week. Students will get to experience a Rocket launch, mobile Planetarium and learn about the weather from a meteorologist. Students will also get to engage in many hands-on-learning opportunities within their classrooms including virtual reality.
