

Rocky Boy Elementary Board Report

By Clintanna Colliflower

Curriculum & Instruction: Teacher in grade 3-6th have been working on the interim tests for smarter balance. Kindergarten teacher took a week to work on quarter testing. Other grade levels continued on with their regular curriculum and instruction.

Supervision & Evaluation: started our observations for evaluations the end of February and Continued through the month of March. Teacher also started video recording lessons and reviewing them with Desiree.

Culture & Language: I would like to see curriculum maps build for the our Cree Language program. I feel like our program has not made any growth and is at a stand still.

Behavior Management: We were at 117 behavioral referrals but with the change in weather, we have had an increase. We were hoping our behavior referral numbers would be lower this year but it doesn't look promising.

Daily Management: Working on being flexible as possible. Its hard supervising and holding employees who come from tribal departments accountable. Classes are starting to plan field trips.
