Background Information:

The Texas Education Agency (TEA) is transitioning the Texas Student Data System (TSDS) to Ed-Fi as of the 2024-2025 school year. This is the system for PEIMS reporting. With the help of Region 4, the Exchange acts as the bridge, ensuring that the data used for local district analytics is the same high-quality data used for state reporting. Reporting and troubleshooting errors has been cumbersome, the Exchange can provide the PEIMS team with plug-and-play dashboards giving us real time insights regarding student performance, attendance, and graduation tracks.
