

The Pond being constructed at 11116 N Clio Rd will be fed / filled by ground water, storm runoff, and possibly a spring.

TTR Excavating will dig an 80'x175' approx. 12' deep pond at 11116 N Clio Rd for Ed Ritter.

TTR will use a hydraulic excavator to dig the pond. The spoils will be piled on three sides of the pond approximately ten feet from the pond. Once the spoils are dried, they can be graded and seeded or whatever the homeowner tends to do with them.

This pond will be used for wildlife, swimming, fishing and such.

There are various ways of keeping a healthy pond including dye, aeration, chemicals. All of which are highly recommended.
