- Discussion
- Information

Purpose/Background:

XtraMath is a digital tool for helping students in math get immediate feedback regarding their speed and accuracy of computation. As students complete problems, the system adapts to target the areas in which students struggle with specific skills. Teachers track student progress using fluency reports, and can customize programs to differentiate for students. For example, one student can be working on multiplication and division while another can work on addition.

District Legal Counsel reviewed the XtraMath Terms and Conditions and found them acceptable. In the past Counsel proposed an Amendment to the Agreement addressing terms such as Governing Law and Venue, Freedom of Information Act requests, and SOPPA language to ensure compliance with state law. That Amendment was agreed upon and accepted by XtraMath and is still valid. District currently has a vendor specific agreement on file that covers all SOPPA requirements.

Fiscal Impact:

\$500 for Grades 3 through 5 for service between the dates of December 21, 2022 and December 21, 2023.

Recommendation:

It is the Administrative recommendation that the Finance Committee concurs to recommend to the Board of Education to approve the XtraMath Quote in the amount of \$500 for the service dates December 21, 2022 and December 21, 2023.
