Re: Approval of Hellas Construction, Inc. for Coppell High School Indoor Turf Replacement

The 2023 Bond election (Proposition D) includes the replacement of the indoor artificial turf at Coppell High School.

Our civil engineer, Glenn Engineering, worked closely with CISD staff, Kit Pehl, and his department to create specifications and architectural plans that meet the needs of the district. Upon completion of the specifications and plans, we placed the specifications out for quote utilizing the cooperative purchasing method. The cooperative utilized in this quote is 1 Government Procurement Alliance (1GPA), contract #23-01DP-03. This procurement method is in accordance with Texas Education Code §44.031.

We received two proposals from two very qualified vendors including, Hellas Construction, Inc. and Paragon Sports Constructors. The proposal from Hellas Construction, Inc. provided the bid that is the overall best value for Coppell ISD. Additionally, the Hellas quote is the least overall cost at a total of \$781,915.00 when compared to the other quote. This price came in well under the amount allocated in the bond (\$2,464,000 allocated). The price also includes replacing all the padding around the walls of the building.

Hellas has completed several turf and track projects over the last twenty (20) years with Coppell ISD. Their installation, service, and warranty work have always been very timely and excellent. If approved, the work will begin early spring of 2025 and be completed early summer of 2025.

RECOMMENDATION: That the Coppell ISD Board of Trustees approve the proposal from Hellas Construction, Inc. for the replacement of the indoor artificial turf at Coppell High School for a total cost not to exceed \$781,915.00.
