A Shutdown and a Shadow

February 2nd is Groundhog Day but the markets had a six-week shadow moment in January as the Fed saw its own six-week shadow on global growth. So for the time being rate hikes are on temporary hold. The Fed is being "patient" and "data dependent" which is a move away from 4Q calls for rate hikes to counter potential inflation pressures caused by then perceived growth. Over all it is a shift to greater risk management and interpreted by some that the next move could be up or down. Meanwhile the Fed is focused on the positives: very strong employment, moderate growth and inflation close to its 2% target.

The second major issue for the Fed is the normalization of the balance sheet. Accumulated during the QE (quantitative easing) period the Fed has moved to reduce their owned securities. Markets may not like this action as it will increase the supply (reducing prices) and tend to increase rates on the long end. But this action is not tied to the Fed's monetary rate policy and could continue towards their goal regardless of decisions on the short end rates. The decrease is not a policy tool but a technical move by the Fed.

The Fed, and the markets, were less concerned with the historic 35 day government shutdown which hinged on funds for border security and political intractability. The CBO has estimated the recent shutdown shaved 0.04% from Q1 GDP. An agreement must be reached before a 3 week deadline for another shutdown which would not bode well for the economy. This could prove to be a recurring theme in 2019.

More closely watched were Brexit and continuing Chinese trade talks. The Brexit battle is intensifying as rival factions compete on different exit plans. Probably any plan will entail further negotiation with Brussels. It is the impact of a UK exit on the future of the EU that raises the greatest spectre. As the month ends, a Chinese trade delegation is in DC and are expected to offer big increases in farm products and energy. Large economic structural changes remain elusive, however. But, China needs to see some benefit from a trade deal. The country has slowed from 9% to 6% growth and the government is supporting industries and financial institutions hurt by the tariffs. If the dollar suffers from the deals Japan and China will sell their currencies and buy USD and then treasures which could lower rates.

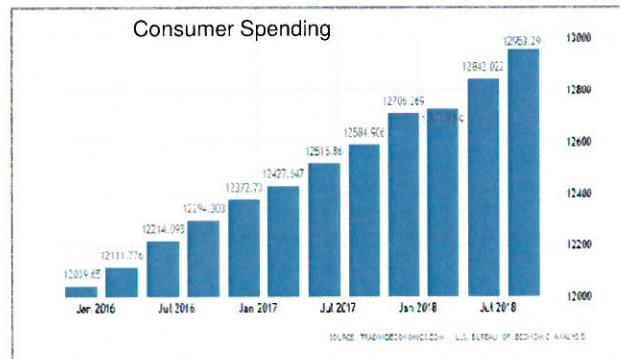

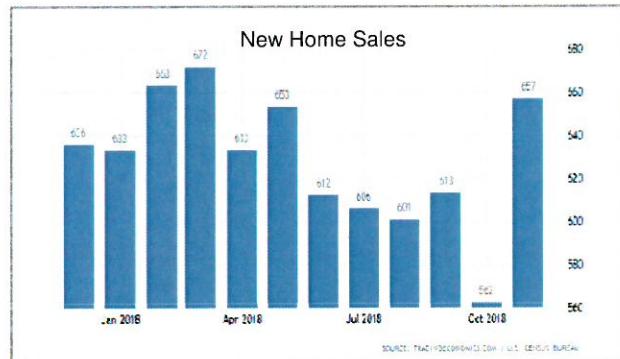

Hard Data Continues to be Positive

The negative narratives in the media and the markets paint a generally negative picture of the economy that hint of a coming recession. However, the Fed still sees economic growth as "solid" and household spending "growing strongly". Much of the sentiment disconnect can be attributed to that growth being decidedly less robust than last year, but growth there is. The additional negatives come from the major global events such as Brexit and trade talks which add considerable uncertainty to any outlook.

A recession is defined as two successive quarters of lower GDP (reduced trade and industrial activity). On average since 1970 the time from inversion of the curve to recession is 15.5 months and not every inversion signals a recession. What causes it? Typically the Fed tightening removes liquidity from the markets and reduces the Net Interest Margin (spread between borrowing and lending). Lenders become more cautious so business activity declines. There has not yet been a significant tightening of NIM and along with moderate growth and on the basis of the historic time periods we may not see a recession until 2020. But, then again 2020 is an election year and Congress loves to spend before an election which throws a recession off until 2021!

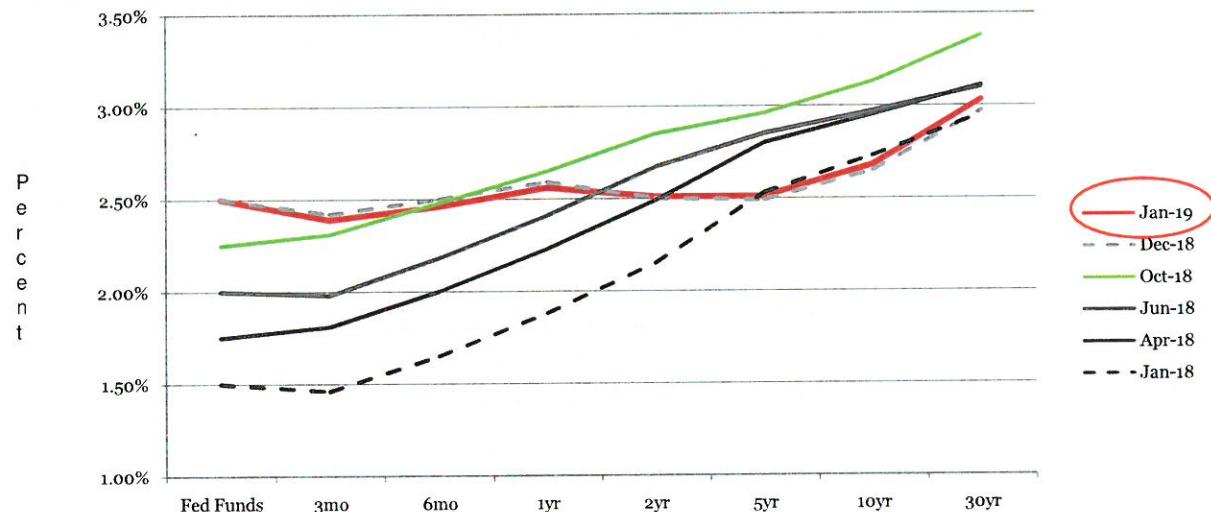

Positives remain in housing and with the consumer. New home sales have seen a material pickup in 2019 although existing home sales are down. Some of this is a natural growth from higher mortgage rates. The consumer may not be as confident going forward but it is not slowing her spending. Some of this could be generated from the low oil prices creating a wealth effect at the pump. Definitely the biggest positive is employment. Major gains in December and January show companies are adding workers and boosting pay. This resilience underscores the demand for labor which supports the consumer spending. The consumer will not have the tailwind of the 2018 tax cut but increased wages may counter some of that negative.

A major discussion during the first quarter will be on the future of FNMA and FHLMC as part of the overall discussion on housing finance reform. Several talking points move towards allowing outside competition for the two housing giants or allowing them to hold their own capital. Some thought is being given to an explicit guarantee from the US. All of these will affect the fixed income market – hopefully in a positive way.

The Flattening Curve

- An inversion does still appear on the curve but not from 2s to 10s. And, historically this inversion has predicted 7 of the last 5 recessions! Not a good track record. Plus the time from inversion to recession (since 1970) has averaged 15.5 months. Also not a panic situation.
- Rates from the 5-year out almost to the 30 year have crossed below those from one year ago ending the year with the 30 year only slightly higher.
- Fears of a recession controlled in December and early January but strong payrolls and moderate data are moving the possibility of a recession out to 2020.
- The key to interpreting the yield curve continues to come from the general slowing of the global economy and the anticipation that without inflation or stronger growth the Fed will not be able to continue raising rates. If the Fed does not raise rates money will be cheap and stock markets will continue to run.

End of Month Rates - Full Yield Curve – Fed Funds to 30yr

Portfolio Summary Management Report

Portfolio as of 12/31/18:

Beginning Book Value	\$ 529,014,540
Beginning Market Value	\$ 528,755,468

WAM at Beginning Period Date¹ 65 days

(Increase in market value is due to seasonal cash inflows)

Average Yield to Maturity for period	2.470%
Average Yield 3 Month Treasury Bill for period	2.420%

Portfolio as of 01/31/19:

Ending Book Value	\$ 561,154,982
Ending Market Value	\$ 560,968,164

Unrealized Gain/Loss \$ (186,818)

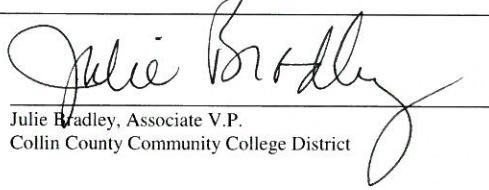

WAM at Ending Period Date¹ 52 days

Change in Market Value² \$ 32,212,696

Kenneth D. Lynn, Chief Financial Officer
Collin County Community College District

2/12/19

Barbara Johnston, Associate V.P.
Collin County Community College District

Julie Bradley, Associate V.P.
Collin County Community College District

1 WAM – weighted average maturity

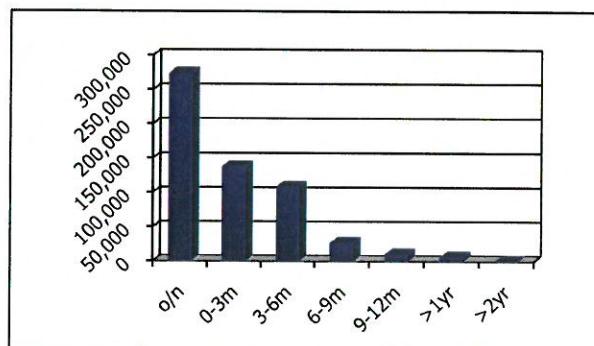

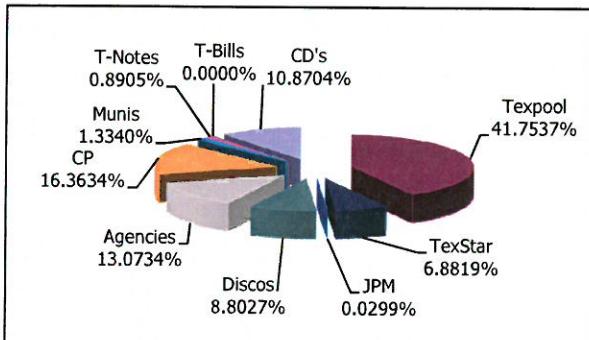

2 "Change in Market Value" is required data, but will primarily reflect the receipt and expenditure of the District's funds from month to month.
Patterson & Associates has assisted in the preparation of this consolidated investment report, with additional input provided by CCCCD.

Your Portfolio

As of January 31, 2019

- P&A constantly reviews your portfolio for optimal asset allocation and a controlled average maturity because a diversified portfolio can better adjust to volatile market conditions.
- The graphs below show asset allocations by market sector and by maturity. They do reflect our anticipation of a rate increase in 2019 – and possibly two –but not in the first quarter. This slowdown in rate hikes and the potential of decreasing rates indicates the need to extend portfolios. Extending now will lock in yields even though rates may decrease and provides for extra safety.
- The non-cash portion of your portfolio is yielding 2.55%.
