

Board of Education

ACTION

TITLE: Consider Approval of the Peak Infrastructure Drainage Phase 4 Design

DATE: November 17, 2025

RESPONSIBLE ADMINISTRATOR: Mr. Shawn Shaffer
Executive Director of Facility Operations

BACKGROUND/CONSIDERATIONS:

The Peak Infrastructure Drainage project addresses longstanding drainage deficiencies within the district's facility. Phases 1 through 3 focused on preliminary assessments, priority repairs, and system upgrades. Phase 4 begins the design and planning for comprehensive drainage improvements, ensuring long-term functionality, safety, and compliance with regulatory standards.

RECOMMENDATION:

The administration recommends that the Board consider approval of the Phase 4 Design for the Peak Infrastructure Drainage project, allowing the district to proceed with detailed planning. If the Board agrees, the motion would read: ***move to approve Peak infrastructure drainage phase 4 design.***
