

BP 7310 METHODS OF FINANCING

Growth, safety considerations, and educational program changes may require the construction of new facilities and the reconstruction of existing facilities. The purchase of school sites and the construction of buildings may be financed by any legally provided means which the District is qualified to employ, including state-financed assistance.

Note: 4 AAC 31.060 requires districts using state aid granted under AS 14.11.020 to comply with all pertinent laws and regulations related to the construction of a public school facility.

The Superintendent shall determine the anticipated share of the school District's participation in the cost of any proposed school construction or major maintenance project, and shall evaluate available means of making the local contribution required by law. These alternatives may include the sale of capital bonds, the use of available federal funds or funds from other sources and, where applicable, locally contributed labor, material or equipment.

Note: The following language is optional for school districts with full value ADM (Average Daily Membership) of \$200,000 or less, which is calculated as described in AS 14.11.008(b). A qualified school district that is unable to provide the required participatory share of a construction project, may, under certain circumstances, be eligible for a waiver of that contribution.

If the District is unable to provide the required participatory share through federal, local or other funding sources, and is unable to satisfy its participatory share through local contributions, and it can be demonstrated that the required participatory share will jeopardize receipt of federal assistance, the Superintendent may request in writing from the Alaska Department of Education and Early Development a full or partial waiver of the local contribution.
