

January 22, 2019 Q&A

Homer Flores:

Presentation/Report 9 & DPA 6

Good afternoon Mrs. Sendejo, i have a question about the scoreboards in your presentation. There are different models listed with specific model #'s. Maybe I missed it, however what company carries these models? **The models presented are manufactured by Electro-Mech.**

As you know we have a brand new scoreboard at the softball complex that has been problematic since it was installed and recently had the baseball field replaced because the current vendor for that scoreboard didn't have parts to replace therefore a new one for the baseball field was purchased. Is it the same company? **The baseball and softball scoreboards are manufactured by Spectrum.**

Are there finance options available with the presented scoreboard options? **There are several unconventional ways of paying for these, but taking on debt is a component of all of them, save for one. There is bank financing available, and vendor financing available, but each would be outside of our current debt structure and could impact the district's bond rating. A couple of alternatives that exist that would not require taking on debt is to either solicit a sponsor for the equipment, itself, or sell naming rights to a particular facility.**

Thank You for all that you do Mrs. Sendejo.
