**03/16/26**  
**Technology Report**

We continue to work on our network configurations. With the new phone system and new cloud copier system, we have to make vast changes to our network switch configurations, firewall settings, as well as the wireless access point settings. We also have to make these changes during times of minimum use.

We also are looking into a backup internet provider, in case our current provider should go down for any reason. With most of the school's apps, devices, and software relying on the internet, it would be beneficial for us to have one in case of an outage for any reason.

We have received some backup chromebooks for classrooms and we should be receiving ipad replacements for the Pre-K classes at any moment also.

*Mitchell*
