

Proposal to replace Northome School Music Room Digital Clavinova Piano

Currently the digital Clavinova piano used by the music room, at concerts and for instruction is 20 years old. The computer board in it only turns on and works intermittently. We have called Yamaha dealers, and they no longer make parts or service this model.

We propose replacing the current piano with the modern version of the clavinova. Yamaha is a trusted brand with proven longevity. These styles/types of instrument are compatible with how our music program currently functions. We would be upgrading to the most current version of the same instrument we already have, but with modern capabilities and connectivity.

These are the 2 version of the Clavinova that would best replace what we currently have:

First is the CVP-701 This is the base model of the clavinova style version we currently have.

Yamaha Clavinova CVP-701 Digital Piano - Matte Black

\$4,299.99

Special Financing Options Available
Offer available through 6/30/24. [LEARN MORE](#)

- 525 styles
- Follow Lights, Any Key, Karao-Key, Your Tempo lesson guides
- Bluetooth audio
- Microphone input
- USB to HOST audio/MIDI interface

Additionally, we may need a new dolly to put the piano on so it is easily moved around. The current clavinova has a dolly under it that may fit the new piano, but it would need to be measured to ensure it would fit under the new instrument.

If we needed a new dolly, this is the approximate cost of a dolly that would fit the new piano:
