### **Academic Intervention Program**

PreK-7th grade students considered for the Academic Intervention Program are already receiving services through our MTSS process. Multiple points of data are used to determine Tier II and Tier III students.

Students will be grouped by current grade level with a ratio of 1 teacher to 5 students. Depending on enrollment, grade levels may be combined but the teacher/student ratio will attempt to stay at 1 to 5. The final determination of classes for the intervention programs will be made at the beginning of June.
