

Discussion Item

Date: November 4, 2024

Division: Finance

Subject: Report on the 2024 Facilities Assessment Document

Background Information:

- In November of 2015, Facility Services personnel completed a comprehensive assessment document for the District's facilities. That document involves a three-tiered approach to the assessment of a building's condition.
 - A measure of the remaining estimated useful life of the component.
 - A physical inspection by the technician skilled in working on the respective component.
 - An evaluation of the repair history using the District's work order system.
- The original document produced in 2015 is updated annually based on current information related to the assessment approach outlined above.

Administrative Consideration:

- The updated Facilities Assessment Document will be provided to the Board of Trustees and uploaded on the District's website.
