

Board Report 11/11/19

Maintenance/Transportation

Irrigation is over and all lines are blown out.

Mowing is about done. We will do the football field before the games just to try to make it look better.

Isaac Henry has offered to install electric valves at the football field. Isaac is willing to donate the layout and labor.

7 new valves and miscellaneous = \$3700.00

This system will hook up to the river pump. It will allow us to irrigate at night instead of trying to irrigate around practices, games, and activities.

We do have a well drilled that needs a pump. Once a pump gets installed we will be able to figure out how many sprinklers it will run and what we will have to do to rezone it. Isaac Henry is also willing to help out with this.

Installed lights and plug at the football field ticket booth.

The Transportation Dept. is down one daily driver (route 4), and as of Monday 11/4/19 we are down one sub. We are running a help wanted add with hopes of finding someone.

The weight room had a fan motor go out. This system has two fans sucking air from the gym to the room, which doesn't work very well. Talking to the teacher he can get by with the one fan currently running. He would rather save the cost of the motor and apply it to a heating and cooling unit. The room is 40'X60' a unit capable for the room is \$15,000.00 to \$18,000.00 installed.
