

Executive Director Board Report

September 27, 2022

- We are off to a great start to the school year! Students are excited to be back in the schedule and routine of school! The new playground is well-used throughout the day and has been a huge favorite for students in SUN and ALEX!
- Staffing for our open EA positions continues to be challenging. We started the school year with our current staff available and will continue to make the best adjustments we can to meet the needs of students. A huge “thank you” to our staff and their dedication to teamwork to make everything run smoothly!
- We welcomed our largest group to CVSEC at the start of the school year. Member districts have indicated a continued need for more referrals to both SUN and ALEX.
- CVSEC is a trauma-informed school with adult-managed spaces. Our Behavior Intervention (BI) teams have been problem-solving with students, adjusting and assisting students with regulating, and are well-established with the internal routines and management that make our building safe for students to learn.
