

Date: October 6th, 2025

To: Dr. Robert Halverson, Superintendent of Schools
East Aurora School District 131 Board of Education

From: Andrew Allen, Assistant Superintendent of Operations

Informational:

On September 9, 2025, the City of Aurora Water Department notified the district that our schools might have lead in their water supply. While the city's water is lead-free, older service lines connecting to school buildings could contain lead solder.

The district has been proactive in addressing this concern. Extensive water testing, including drinking fountains and sinks, was conducted in 2017 and 2018. The results are available on the district's website. We have also made significant improvements to our water infrastructure, including replacing all old horizontal and vertical water supply piping at the high school during the summers of 2023 and 2024. Furthermore, every drinking fountain with a bottle filler is equipped with a filter designed to remove lead and other contaminants.
